-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

Art Unit: 1732

1.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2.Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yang (6,129,798) in view of Cheskin (4,676,010) as set forth in the previous Office action.

3.Applicants' arguments filed January 11, 2007 have been fully considered but they are not persuasive. Applicants initially argue that the raw materials (used in the processes of the prior art relied upon) are different from those used in the process of the present application in that the cited references use EVA or synthetic rubber while applicants use TPE. This is not persuasive because Cheskin teaches at column 1, lines 58-60 that an appropriate elastomer, such as one of EVA, may be "rubber-like", which, to the examiner, is distinct from stating that "synthetic rubber" is to be used, as stated by applicants.

Applicants next argue that the recipes (between the prior art and the instantly claimed process) are different in that the present application is aimed at the composition of the materials added in the process. Applicants do not mention a specific claim in making this argument, but it is noted by the examiner that claim 1 calls for the adding of foaming agent and crosslinking agent into the raw material and Yang teaches the addition of foaming (blowing) agent and crosslinking agent to the raw material at column 2, lines 28 and 29.

Applicants then argue that the crosslinking agents are different since TPE itself has some physical crosslinks so that the crosslinking agent added in the (instant) process only has a percentage within 0.05% to 0.5%. It appears to the examiner that this particular range is not commensurate with the range of any instant claim, and it is the examiner's position that it is well within the skill level of one of ordinary skill in the art to alter the amount of crosslinking agent used in order to effect a desired degree of crosslinking.

Applicants' arguments concerning (1) the criticality of how to control the speed and period for uniformly mixing the raw material and additives, (2) worker health and safety issues related to additives used, and (3) product properties are noted by the examiner, but these arguments also appear not to be commensurate with the instant claims.

**4.THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
